

Take driver management to a new level with DriverManager™ 3.1g

Now there's no reason why any employee with an invalid driver license should be operating a vehicle on official business. And no supervisor will ever need to say, "I didn't know."

DriverManager 3.1g from License Monitor, Inc. raises the bar for managing driver risk. It gives you the accountability the public expects, reduces claims, improves driver performance and demonstrates fiscal responsibility.

Public safety is a primary responsibility of all governmental organizations. If you use DriverManager 3.1g, you can be confident that any driver who gets behind the wheel on official business is properly licensed, endorsed and in compliance.

However you look at it, DriverManager 3.1g is a cost-effective investment that improves safety, increases productivity, frees up funds and personnel for other needs, and helps avoid negative publicity.

"License Monitor helps our people do a better job managing driver risk. Just as important, it pays for itself. Avoiding one mishap more than makes up for the cost."

*-- Karen Cassa, Insurance Coordinator
County of Rockland, NY*

Major DriverManager 3.1g benefits

- DriverManager 3.1g is web-based and completely encrypted so you can securely access driver data any time and anywhere there's an Internet connection.
- With our 24/7 New York State DMV interface, there's no waiting for data to be sent to you. The License Monitor system actually goes out and retrieves the information you need.
- You receive DriverAlertssm by email on all DMV driver license changes. You get all changes fast, giving you time to take corrective action, including:
 - accidents
 - accident prevention courses
 - fingerprinting
 - convictions
 - suspensions/pending suspensions
 - expirations
 - revocations/pending revocations,
 - other states' surrenders
 - DWIs/DWAls
 - name/address changes
 - license class changes
 - CDL changes
 - S19-A status changes
 - hazmat endorsements
 - reciprocity
 - license restriction and renewal changes
 - fraudulent activity
- Exclusive AuditLogsm system. The Driver's Privacy Protection Act requires organizations to log every motor vehicle record search performed in the last five years, including who made the request, when and why the request was made and under what "permissible use." Normally, a painful, time-consuming process, this information is now instantly available via DriverManager 3.1g.

"Our main purpose in using the License Monitor service is liability. We have criteria for our drivers and they can't operate the equipment if they exceed these values. License Monitor helps us fulfill that responsibility. If it helps avoid one accident, the cost is justified."

*-- Richard Paul, Superintendent
Massapequa Fire District, LI*

"License Monitor is an excellent risk management tool. It's effective because it helps us identify problems before they occur and it gives us greater confidence that any employee who operates a vehicle in an official capacity is properly licensed."

*-- Robert S. Berdy
Insurance & Claims Manager
Town of Clarkstown, NY*
