

A GREAT TOOL FOR FLEET ACCOUNTS

“IT’S A BIG ADVANTAGE HAVING LICENSE MONITOR. I COME TO PROSPECTS WITH A SOLUTION—NOT JUST A QUOTE.”

Robert Lanciotti, Archer A. Insurance, Inc., Franklin Square, NY

Rob Lanciotti doesn't mince words. "When I see a prospect with a fleet of vehicles, I want to bring something that gets their attention. That's what License Monitor gives me."

License Monitor also makes an impact on commercial auto insurance. "When I'm marketing a new account to a carrier and there's a problem, I tell them the client is now on License Monitor," says Rob. "It shows they're serious about having a good driving record."

Insurance companies are impressed with License Monitor. "One company thought it was so valuable, they absorbed the cost," says Rob.

"Every agent wants to pick off the easy, clean accounts," notes Rob. "With License Monitor as a loss control program, we go after those with problems that are driving up insurance premiums, solve them and reap the benefits for a long time."

Take Rob Lanciotti's word for it. Find out how License Monitor can put you in the driver's seat with prospects.
