

Taking school bus driver management to a higher level

In a perfect world, you wouldn't need License Monitor to help manage driver risk.

DriverManager® 3.1g

24/7 proactive driver license monitoring, plus 19-A monitoring and compliance
Assures accuracy, reduces costs, improves productivity and avoids bad publicity

Driver license data that works

As a school bus operator, you are responsible for the performance of your drivers. A critical component of your job is making certain each driver has a valid license and is in compliance at all times. To do that, you need accurate, timely data at your fingertips.

DriverManager 3.1g—The fastest way to receive driver license activity and 19-A status changes.

What if you received an email alert letting you know a driver had his 19-A status disqualified last night?

What if you were continuously updated of drivers whose 19-A requirements were expiring in the next 30 days?

What if you received DWI, suspension/revocation and all other pertinent driver license activity within 24 hours?

What if you could complete your 19-A reports in seconds, and be prepared for an audit just as quickly?

What would you say?

If you're like our clients, you would say, "That's exactly what I get from License Monitor."

With License Monitor's DriverManager 3.1g, you have all the information you need, delivered every morning to your desktop just the way you want it—so you can do the best possible job managing driver risk.

License Monitor delivers time-saving and cost-cutting benefits

- Identify at-risk drivers before there's a problem
- Reduce accident frequency and severity
- Avoid unpleasant PR situations
- Pre-screen drivers fast
- Control insurance costs

Problem solved: Instant 19-A status alerts

"I had a driver whose 19-A status was disqualified. We found this out right away through License Monitor's DriverManager 3.1g system."

"As soon as the disqualification hit her record, we knew about it. It's there and it's instantaneous. Without it she would have been driving a school bus with her 19-A status disqualified and could have been involved in an accident."

"With License Monitor it's right there, and it's right now."

Richard Swingley, Driver Manager,
Webster School District, NY

School bus driver management taken to a new level

License Monitor's DriverManager 3.1g gives school bus supervisors the only total driver management system.

DriverManager 3.1g enhances License Monitor's proven core monitoring functions by adding two industry-specific components designed for employers and organizations that operate school buses.

In addition to the constant monitoring of New York State DMV driver license statuses and the timely reporting of suspensions, revocations, convictions, accidents, DWI's, expirations and all other critical information, DriverManager 3.1g includes 19-A *StatusMonitor* and 19-A *ComplianceMonitor* that make it easy for bus operators to stay in compliance with strict school bus regulations.

License Monitor clients receive proactive eAlerts signaling a change in a bus driver's status—Active School Qualified, Active Non-School Only,

Inactive School Qualified, Inactive Non-School Only, Disqualified and Non-19-A.

At the same time, 19-A *ComplianceMonitor* manages all DMV regulatory compliance requirements. This is a web-based system, accessible 24/7, and fully integrated with all 19-A forms and each driver's up-to-date motor vehicle record information.

Drivers are monitored to ensure they remain in compliance. All drivers due in 30 days or out of compliance are prominently displayed.

The system archives 19-A activity and pre-populates all regulatory forms. License Monitor automates the process to make it both quick and accurate.

DriverManager 3.1g is the fastest way to receive driver license activity and 19-A status changes.

Put DriverManager 3.1g to the test today.

"I never have to say I didn't know."
